Allowable Subject Matter

6. Claims 1, 3-6, and 8-10 are allowed.

Reason For Indicating Allowable Subject Matter

Claims 1 and 6 identify the distinct features, "providing a flag with at least one star of the plurality of stars, each flag indicating the availability of its associated star, selecting a stargroup associated with the measure, the stargroup comprising one or more stars, comparing one or more dimensions indicators of the one or more stars of the selected stargroup to one or more requested levels of aggregation, evaluating the availability of the one or more stars of the selected stargroup by reviewing their associated flags, selecting a particular star of the one or more stars based on the comparison of the one or more dimension indicators to the one or more requested levels of aggregation and the evaluation of the availability of the one or more stars, and querying the associated aggregated fact tables of the selected particular star, wherein the associated aggregated fact tables comprise the aggregated facts" are not taught or suggested by the prior art made of records. The closest prior art, Weissman et al. (U.S.

Patent No. 6,212,515) disclosing a star schema with fact tables and dimension tables for a data analysis, fails to suggest the claimed limitations as mentioned above in combination with other claimed elements. The above features in conjunction with all other limitations of the dependent and independent claims 1, 3-6, and 8-16 are here by allowed.
